

ASW50

ASYMMETRIC WARRIOR® PRECISION TACTICAL RIFLE SYSTEM

THE LARGE CALIBER ASYMMETRIC WARRIOR® ASW50-AI PRECISION TACTICAL RIFLE

is engineered and designed to provide users with an ergonomic long range and highly accurate .50BMG rifle platform. This precision tactical rifle is proudly manufactured in the USA and built on the strong, time tested McMillan 50BMG bolt action receiver, and the patented SABER®-FORSST® MT-50 MOD-1 modular rifle chassis with a 5-rd detachable magazine. The ASW50 is an ideal tactical rifle platform for launching high performance .50 caliber Mk211, RUAG Swiss-P SX, and AMAX® match grade ammunition accurately to extended ranges.

The ASW50 is barreled with a 29" McMillan or Pinnacle Series 416 stainless steel fluted barrel in custom length's, engineered using APO's proprietary B.A.S.E.D.™ barrel engineering software. The ASW50 Pinnacle Series barrel is finished with an 11° degree target crown and the highly effective McMillan 50BMG muzzle break. You can replace the ASW50 muzzle break with a highly effective optional suppressor that really tames the muzzle blast from the mighty .50BMG cartridge. The ASW uses a premium tactical two-stage trigger set to 3.5 lbs for a smooth take up, and crisp let off for precision shot placement. Take a look at the ASW50 video on the APO website, it's quite a different .50BMG shooting experience!

The ASW50 features a continuous full length MIL-STD 1913 30MOA monolithic top scope rail (optional 20, 40 and 60 MOA) that fit a variety of modern "clip-on" thermal imaging and night vision devices. The Quattro carbon fiber forend features a heat mirage mitigating design with repositionable 12" and 4" accessory rail locations at 3, 9 and 6 o'clock positions.

The detachable SABER PBA-H (Push Button Adjustable Hybrid) ergonomic shoulder stock is easily fit by the user with adjustments for length of pull, cheek-piece height, and vertical recoil pad placement requiring no tools! The ASW50 is available with two popular options, a versatile multi-position, adjustable field Monopod and Long Range Accuracy bipod.
