SPR-308

SABER-Precision-Rifle.com

SABER® Precision Rifle - Tactical System

The SPR-308 SABER® Precision tactical rifle is a rugged and dependable precision rifle manufactured by Ashbury Precision Ordnance. The full featured SPR-308 is designed to provide users with a durable, modular and ergonomically adjustable precision rifle designed for reliable accurate service under tough field conditions. Chambered in .308Win or 7.62 x 51mm, the SPR-308 provides exceptional accuracy and is capable of precision target engagements at distances exceeding 800 meters.

Designed for precision intermediate to long distance shooting in the field, the SPR-308 provides users with many notable operational features. **The Action:** APO's SABER® SX octagonal stainless steel bolt action receiver is precision CNC manufactured to close tolerances with a one-piece bolt crafted of tool steel, finished with a tough Black Nitride coating. **The Barrel:** Pinnacle Series stainless steel – fluted contour - match grade, threaded muzzle, and highly efficient muzzle brake suppressor adapter. **The Trigger:** Adjustable single-stage trigger which breaks crisply at 3 lbs.

The Patented SABER Chassis: SABER ASX MOD-1 Alloy Tactical (AL-T) modular rifle chassis system. SABER rifle chassis are rugged, reconfigurable, low maintenance, and require no bedding to deliver optimal accuracy. SABER rifle chassis are impervious to foul weather conditions, and hot/cold temperature extremes. **The Ergonomic Shoulder Stock:** Tool-less ergonomically adjustable PBA-H (Push Button Adjustable Hybrid) shoulder stock. The PBA-H provides push button length of pull, vertical recoil pad position and thumbscrew cheek piece height adjustments - all positive locking and completely tool-less! The PBA-H utilizes a butt hook for non-shooting hand support, and an optional rapidly adjustable 3-position field monopod.

The SPR-308 has a user adjustable hand grip to customize the distance-to-trigger for large and small hands and an interchangeable near vertical 11° grip angle. The SPR-308 is fitted with an ambidextrous paddle lever magazine catch-release and comes with one ten round magazine.

The SPR-308's Quattro Alloy Tactical forend features a heat vented design, with M-LOK accessory attachment locations for MIL-STD 1913 accessory rails at 3, and 9 o'clock positions and at 6 o'clock for bipod/tripod attachment. The SPR-308 also features Ashbury's patented, continuous one-piece unitized MIL-STD 1913 20 MOA monolithic scope rail. The patented monolithic rail provides a secure rifle scope mount, reduces vibration, and increases structural rigidity for long range accuracy, and in-line attachment of clip-on night vision and thermal weapon sights.

Ergonomic adjustability, modularity, shoot-ability, and low-felt recoil with ½ MOA precision are all hallmarks of the SPR-308 Precision Tactical Rifle.

Shown with Optional Accessories

Utility & Design Patents at
APO-Patents.com

Trusted to Make it Better!

CALIBER

.308 Winchester (*optional 7.62 x 51mm*)

ACTION
