Modular Precision Light Rifle

The SUPRA Precision Light Rifle is designed for the many rifle shooting enthusiasts desiring the form, fit and functionality of an AR, in an accurate, lightweight, maneuverable and modular precision bolt action rifle. Each SUPRA rifle is hand crafted by Ashbury's experienced precision weapons section lead by USMC trained gunsmiths, armorers and proud American craftsmen using Ashbury's precision machined SABER® stainless steel actions, match grade hand lapped barrels, rugged and reliable triggers and patented advanced technology SABER MRCS-AR rifle chassis. APO's SABER chassis based precision rifles require no bedding, are low maintenance and deliver consistent sub $\frac{1}{2}$ MOA performance with factory match grade ammunition. Custom SUPRA Precision Light Rifles are chambered in 15 different short and long action calibers and in right or left hand configurations. The SUPRA Elite Model utilizes a premium Proof Research match-grade barrel and SABER TASS ergonomically adjustable shoulder stock.
