TCR 300 SHORT ACTION TACTICAL COMPETITION RIFLES

THE SHORT ACTION SERIES TCR TACTICAL COMPETITION RIFLES ARE ENGINEERED AND DESIGNED TO PROVIDE users with a versatile rifle platform in .223 Remington, .260 Remington, 6.5 Creedmoor, and .308 Winchester calibers. This precision tactical rifle is proudly manufactured in the USA and built on the strong Surgeon RSR bolt action receiver, and the patented SABER®-FORSS® MOD-0 modular rifle chassis. TCR Short Action rifles are available in an A3 configuration accepting either a 5 or 10rd magazine.

TCR's are barreled with Pinnacle Series 416 stainless steel fluted barrels that are safety and performance engineered using APO's proprietary B.A.S.E.D. barrel engineering software. A TCR Pinnacle Series barrel is finished with an 11 degree target crown.

TCR muzzles can be optionally threaded and provided with a Muzzle Thread Protector making TCR Short Actions in .223 and .308 eligible for U.S. F-TR competitive events. TCR's uses a premium tactical two-stage trigger set to 3.5 lbs for a smooth take up, and crisp let off for precise sub-MOA shot placement.

TCR rifles feature an ergonomic MOD-O Quattro carbon fiber forend that is comfortable in the off-hand shooting position and reduces heat mirage. Additionally the forend has 12 o'clock and 6 o'clock MIL-STD 1913 accessory rail locations that accommodate "clip-on" night vision devices and re-positionable bipods.

The fixed SABER HTA ergonomic shoulder stock has tooled adjustments for length of pull, cheek-piece height, and vertical recoil pad placement. The Butt Hook rounds out the shoulder stocks functional design for precision shooting, and a versatile multi-position adjustable field monopod is an available option. TCR rifles have flush cup sling swivel attachment points along the length of the precision rifle.

Max: 8.6000", 0.626 MOA
