

SNIPERS FIELD TOOL KIT

The Snipers Field Tool Kit is a specially designed field maintenance set that provides the tactical marksman and snipers with tools to maintain a broad range of precision rifles and sniper weapon systems. Whether conducting training, tactical or combat operations, weapon platforms that require periodic parts replacement, or that sustain damage, experience sub-system or component breakage in the field require specific tools to make repairs. The Snipers Field Tool Kit can help keep critical weapons assets operational when there is no readily available armorer or gunsmith support. Operators can correctly mount and maintain day and electro-optics; torque action mounting screws to spec; remove or replace US & metric Allen and Torx fasteners; grasp and manipulate small parts & springs; securely store critical small spare parts and tighten or remove Slotted, Phillips, Square, and Torx screws of various sizes and more.
