

360 TACTICAL RIFLE ACCESSORY RAIL MOUNT

M24 SWS with
AN/PVS-26
Night Vision Device

The Rifle Accessory Rail Mount (RARM) by the innovators at 360 Tactical allows users to attach a wide variety of clip-on night vision, thermal imaging, laser pointers and visible lighting systems to rifles with synthetic stocks like the M40 and M24. Constructed from aircraft grade aluminum alloys this very practical 360 Tactical mount requires no modifications to the rifle and simply fits around the forend of the rifle and does not interfere with the day optic. The RARM can be installed in less

than 10 minutes with a simple Allen wrench in the field at operator level! There is no armorer or gunsmith support required.

This strong lightweight Rifle Accessory Rail Mount provides the user with a series of precision machined 1913 Spec'd Picatinny rails at the 12 o'clock, 9 o'clock, and 3 o'clock positions. The side accessory rails are detachable and have been specially designed to accommodate the RULR and STORM laser range finders, as well as the AN/PEQ-2 and AN/PEQ-15 laser pointers. In fact, any appropriate device manufactured with a Picatinny rail grabber can be attached to the RARM to include visible white lights and more! The advanced design of the 360 Tactical RARM mount also provides optional attachments for tripod mounted shooting and a secondary Harris™ bipod mount location. The 360 Tactical Rifle Accessory Rail Mount also fits most custom rifles built on the very popular McMillan Fiberglass Stocks A4 and HS Precision composite stocks as used on the Remington 700 PSS.

RARM Models For:

- M24 / Remington 700 PSS P/N: 081-03V-0003-02
- M40 / McMillan A4 Stocks P/N: 081-03V-0003-03
- Other Rifle Platforms Under Development
