

ASW-300WM

ASYMMETRIC WARRIOR®

PRECISION TACTICAL RIFLE SYSTEM

Clip-on Night Vision & Thermal Weapon Sights

Alternate Calibers

Long Range Shooting Accessories

THE MEDIUM CALIBER ASYMMETRIC WARRIOR® ASW-300WM PRECISION TACTICAL RIFLE is engineered and designed to provide shooters with an ergonomic, long range and highly accurate .300 Winchester Magnum rifle platform. This precision tactical rifle is proudly manufactured in the USA and built on the SABER® **LX** bolt action receiver, and the patented SABER®-FORSS® MOD-1 Carbon Fiber Series modular rifle chassis system (MRCs). The ASW-300WM is available in an ALX A1 (5-rd magazine) or A2 (10-round) configuration. The ASW-300WM is an ideal tactical rifle platform for launching high performance RUAG Swiss-P match grade and speciality ammunition accurately to long ranges.

The ASW-300WM is available with a 24" length, 1-in-10" twist Pinnacle Series 416 stainless steel fluted barrel, safety and performance engineered using APO's proprietary B.A.S.E.D.™ barrel engineering software. The ASW-300WM Pinnacle Series barrel is finished with an 11 degree target crown and muzzle brake suppressor adapter, making this tactical rifle mission ready to mount an optional titanium sound suppressor. The ASW uses a premium tactical two-stage trigger set to 3.5 lbs for a smooth take up and crisp let off for precision sub ½ MOA shot placement.

The ASW-300WM features a continuous full length MIL-STD 1913 30MOA monolithic 12 o'clock scope rail that accommodates a variety of modern "clip-on" thermal imaging and night vision devices. The Quattro Carbon Fiber forend features a heat mirage mitigating design with repositionable 12" and 4" accessory rail locations "co-bore aligned" on the ergonomically shaped forend at 3, 6 and 9 o'clock positions.

The ergonomic folding SABER PBA-H (Push Button Adjustable Hybrid) shoulder stock is fit to the user with adjustments for length of pull, cheek-piece height, and vertical recoil pad drop that require no tools! The shoulder stock comes with a Butt Hook as standard equipment and there is a versatile multi-position adjustable field Monopod available as a user installable option.
